SUBJECT INDEX

Activation energy
The thermal investigation of some normal propylammonium salts in the solid state 43
Adiabatic
The calculation of adiabatic thermal explosion from isothermal DSC measurements 165
Hydrogen peroxide decomposition in the presence of organic material. A case study 213
Gas evolution and pressure increase during undesirable chemical reactions. A survey of the experimental methods to detect gas evolution and pressure increase 239
Determination of thermal and kinetic data of the diazotisation of 6-bromo-2,4-dinitroaniline with nitrosylsulphuric acid 277
Adipic acid
Secondary reactions and detonation hazards in the production of adipic acid 223
Alcohol
Enthalpies of transfer of selected ions from water to water–propan-2-ol mixtures. Some quantum chemical aspects of the ionic solvation 9
Aminotetrazole
The thermal decomposition of aminotetrazoles. Part 2. 1-Methyl-5-aminotetrazole and 1,5-diaminotetrazole 53
ARC
A spreadsheet kinetic model and its use to compare ARC and Dewar storage test data for two exothermic decompositions 177
Gas evolution and pressure increase during undesirable chemical reactions. A survey of the experimental methods to detect gas evolution and pressure increase 239
Atmosphere
Computed gas-phase thermodynamics of the N_2–O_2 complexes 1
Autocatalysis
The calculation of adiabatic thermal explosion from isothermal DSC measurements 165

Barium compound
The thermodynamics of sublimation and vaporization of some volatile β-diketonates complexes with the elements of HTSC phases 137
BDNA
Determination of thermal and kinetic data of the diazotisation of 6-bromo-2,4-dinitroaniline with nitrosylsulphuric acid 277
Benzene
Excess molar enthalpies of mixing of benzene with pyridine bases 31
Binary system
On the estimation of thermodynamic excess properties of binary solid solutions 17
Excess molar enthalpies of mixing of benzene with pyridine bases 31

Calorimeter
The theoretical and experimental investigation of a catalyst-controlled semi-continuous process. An alternative approach 251
Calorimetry
Enthalpies of transfer of selected ions from water to water–propan-2-ol mixtures. Some quantum chemical aspects of the ionic solvation 9
Excess molar enthalpies of mixing of benzene with pyridine bases 31
Gas evolution and pressure increase during undesirable chemical reactions. A survey of the experimental methods to detect gas evolution and pressure increase 239
Heat flow reaction calorimetry under reflux conditions 263
Determination of thermal and kinetic data of the diazotisation of 6-bromo-2,4-dinitroaniline with nitrosylsulphuric acid 277
Catalyst
The theoretical and experimental investigation of a catalyst-controlled semi-continuous process. An alternative approach 251
Exothermic secondary reactions 289
Chelate
The thermodynamics of sublimation and vaporization of some volatile β-diketonates complexes with the elements of HTSC phases 137
Cluster
Computed gas-phase thermodynamics of the N_2–O_2 complexes 1

Co-ordination
The exchange of oxygen isotopes in high-temperature superconductors 119
Copolymer
Thermogravimetric studies of poly(oxymethylene-co-dimethylsiloxane) copolymers 67
Copper compound
The thermodynamics of sublimation and vaporization of some volatile β-diketonates complexes with the elements of HTSC phases 137
Curing
Determination of chemical kinetics by DSC measurements. Part 2. Experimental results 153

Deflagration
Secondary reactions and detonation hazards in the production of adipic acid 223
Decomposition
The thermal decomposition of aminotetrazoles. Part 2. 1-Methyl-5-aminotetrazole and 1,5-diaminotetrazole 53
A spreadsheet kinetic model and its use to compare ARC and Dewar storage test data for two exothermic decompositions 177
Decomposition of aromatic diazonium compounds 201
Exothermic secondary reactions 289
Desensitization
Decomposition of aromatic diazonium compounds 201
Detonation
Secondary reactions and detonation hazards in the production of adipic acid 223
Dewar
A spreadsheet kinetic model and its use to compare ARC and Dewar storage test data for two exothermic decompositions 177
Diffusion
Thermal analysis of conducting polymers. Part 3. Isothermal thermogravimetry of doped and pristine polyaniline 75
Diazonium
Decomposition of aromatic diazonium compounds 201
Diazotization
Determination of thermal and kinetic data of the diazotisation of 6-bromo-2,4-dinitroaniline with nitrosylsulphuric acid 277
Diketonate
The thermodynamics of sublimation and vaporization of some volatile β-diketonates complexes with the elements of HTSC phases 137
Dimer
Computed gas-phase thermodynamics of the N_2–O_2 complexes 1
Polymorphism and thermal behaviour of 3-*para*-toluyl-1,2,2-trimethyl cyclopentane carboxylic acid 97
Infrared spectroscopy and thermodynamics of indium tri-iodide vapour species 111
Doping
Thermal analysis of conducting polymers. Part 3. Isothermal thermogravimetry of doped and pristine polyaniline 75
DSC
On the estimation of thermodynamic excess properties of binary solid solutions 17
Molar heat capacities of some derivatives of uracil and theophylline 37
The thermal decomposition of aminotetrazoles. Part 2. 1-Methyl-5-aminotetrazole and 1,5-diaminotetrazole 53
Polymorphism and thermal behaviour of 3-*para*-toluyl-1,2,2-trimethyl cyclopentane carboxylic acid 97
Determination of chemical kinetics by DSC measurements. Part 1. Theoretical foundations 143
Determination of chemical kinetics by DSC measurements. Part 2. Experimental results 153
The calculation of adiabatic thermal explosion from isothermal DSC measurements 165
Secondary reactions and detonation hazards in the production of adipic acid 223
Determination of thermal and kinetic data of the diazotisation of 6-bromo-2,4-dinitroaniline with nitrosylsulphuric acid 277
DTA
The thermal investigation of some normal propylammonium salts in the solid state 43
Decomposition of aromatic diazonium compounds 201
Secondary reactions and detonation hazards in the production of adipic acid 223
Gas evolution and pressure increase during undesirable chemical reactions. A survey of the experimental methods to detect gas evolution and pressure increase 239
Exothermic secondary reactions 289
DTG
Thermal analysis of conducting polymers. Part 3. Isothermal thermogravimetry of doped and pristine polyaniline 75
Gas evolution and pressure increase during undesirable chemical reactions. A survey of the experimental methods to detect gas evolution and pressure increase 239

Enthalpy
The thermal investigation of some normal propylammonium salts in the solid state 43
Entropy
The thermal investigation of some normal propylammonium salts in the solid state 43
Excess molar heat
Excess molar enthalpies of mixing of benzene with pyridine bases 31
Experimental
Determination of chemical kinetics by DSC measurements. Part 2. Experimental results 153
Explosion
The calculation of adiabatic thermal explosion from isothermal DSC measurements 165
Decomposition of aromatic diazonium compounds 201

Gas evolution
Gas evolution and pressure increase during undesirable chemical reactions. A survey of the experimental methods to detect gas evolution and pressure increase 239

Heat capacity
Molar heat capacities of some derivatives of uracil and theophylline 37
Heat of formation
On the estimation of thermodynamic excess properties of binary solid solutions 17
A topological index and its applications. Part 3. Estimations of the enthalpies of formation of mixed halogen-substituted methanes, silanes and boron mixed halides 85
Heat of reaction
The theoretical and experimental investigation of a catalyst-controlled semi-continuous process. An alternative approach 251
Heat of solution
Enthalpies of transfer of selected ions from water to water–propan-2-ol mixtures. Some quantum chemical aspects of the ionic solvation 9
Heat of transfer
Enthalpies of transfer of selected ions from water to water–propan-2-ol mixtures. Some quantum chemical aspects of the ionic solvation 9
Heat transfer coefficient
Heat flow reaction calorimetry under reflux conditions 263
HTSC
The exchange of oxygen isotopes in high-temperature superconductors 119
The thermodynamics of sublimation and vaporization of some volatile β-diketonates complexes with the elements of HTSC phases 137
Hydrogen peroxide
Hydrogen peroxide decomposition in the presence of organic material. A case study 213

Indium triiodide
Infrared spectroscopy and thermodynamics of indium tri-iodide vapour species 111
IRS
Infrared spectroscopy and thermodynamics of indium tri-iodide vapour species 111
Isomer
Computed gas-phase thermodynamics of the N_2–O_2 complexes 1
Isoperibol
Enthalpies of transfer of selected ions from water to water–propan-2-ol mixtures. Some quantum chemical aspects of the ionic solvation 9
Isothermal
Thermal analysis of conducting polymers. Part 3. Isothermal thermogravimetry of doped and pristine polyaniline 75
The calculation of adiabatic thermal explosion from isothermal DSC measurements 165
Gas evolution and pressure increase during undesirable chemical reactions. A survey of the experimental methods to detect gas evolution and pressure increase 239
Isotope
The exchange of oxygen isotopes in high-temperature superconductors 119

Kinetics
Molar heat capacities of some derivatives of uracil and theophylline 37
Determination of chemical kinetics by DSC measurements. Part 1. Theoretical foundations 143
Determination of chemical kinetics by DSC measurements. Part 2. Experimental results 153
The calculation of adiabatic thermal explosion from isothermal DSC measurements 165
A spreadsheet kinetic model and its use to compare ARC and Dewar storage test data for two exothermic decompositions 177
Safety assessment for polyetherol production using reaction kinetic data 189
Determination of thermal and kinetic data

of the diazotisation of 6-bromo-2,4-dinitroaniline with nitrosylsulphuric acid 277

Lanthanon compound
The thermodynamics of sublimation and vaporization of some volatile β-diketonates complexes with the elements of HTSC phases 137

Model
A spreadsheet kinetic model and its use to compare ARC and Dewar storage test data for two exothermic decompositions 177
The theoretical and experimental investigation of a catalyst-controlled semi-continuous process. An alternative approach 251
Molar heat capacity
Molar heat capacities of some derivatives of uracil and theophylline 37
Monomer
Infrared spectroscopy and thermodynamics of indium tri-iodide vapour species 111

Non-isothermal
Thermogravimetric studies of poly(oxymethylene-co-dimethylsiloxane) copolymers 67
Gas evolution and pressure increase during undesirable chemical reactions. A survey of the experimental methods to detect gas evolution and pressure increase 239
Novel
A topological index and its applications. Part 3. Estimations of the enthalpies of formation of mixed halogen-substituted methanes, silanes and boron mixed halides 85
The exchange of oxygen isotopes in high-temperature superconductors 119
Determination of chemical kinetics by DSC measurements. Part 1. Theoretical foundations 143

PANI
Thermal analysis of conducting polymers. Part 3. Isothermal thermogravimetry of doped and pristine polyaniline 75
Phase
The exchange of oxygen isotopes in high-temperature superconductors 119
Phenate
The theoretical and experimental investigation of a catalyst-controlled semi-continuous process. An alternative approach 251
Polyaniline
Thermal analysis of conducting polymers. Part 3. Isothermal thermogravimetry of doped and pristine polyaniline 75
Polyetherol
Safety assessment for polyetherol production using reaction kinetic data 189
Polymer
Thermal analysis of conducting polymers. Part 3. Isothermal thermogravimetry of doped and pristine polyaniline 75
Safety assessment for polyetherol production using reaction kinetic data 189
Polymorphism
Polymorphism and thermal behaviour of 3-*para*-toluyl-1,2,2-trimethyl cyclopentane carboxylic acid 97
Pressure
Gas evolution and pressure increase during undesirable chemical reactions. A survey of the experimental methods to detect gas evolution and pressure increase 239
Program
Computed gas-phase thermodynamics of the N_2–O_2 complexes 1
A spreadsheet kinetic model and its use to compare ARC and Dewar storage test data for two exothermic decompositions 177
Propanol
Enthalpies of transfer of selected ions from water to water–propan-2-ol mixtures. Some quantum chemical aspects of the ionic solvation 9
Propylammonium
The thermal investigation of some normal propylammonium salts in the solid state 43
Propylene oxide
Safety assessment for polyetherol production using reaction kinetic data 189

Racemic
Polymorphism and thermal behaviour of 3-*para*-toluyl-1,2,2-trimethyl cyclopentane carboxylic acid 97
Reflux
Heat flow reaction calorimetry under reflux conditions 263
Reaction order
Determination of chemical kinetics by DSC measurements. Part 2. Experimental results 153
The calculation of adiabatic thermal explosion from isothermal DSC measurements 165
RRHO
Computed gas-phase thermodynamics of the N_2–O_2 complexes 1

Runaway
Safety assessment for polyetherol production using reaction kinetic data 189
The theoretical and experimental investigation of a catalyst-controlled semi-continuous process. An alternative approach 251
Exothermic secondary reactions 289

Safety
Determination of chemical kinetics by DSC measurements. Part 1. Theoretical foundations 143
Determination of chemical kinetics by DSC measurements. Part 2. Experimental results 153
The calculation of adiabatic thermal explosion from isothermal DSC measurements 165
A spreadsheet kinetic model and its use to compare ARC and Dewar storage test data for two exothermic decompositions 177
Safety assessment for polyetherol production using reaction kinetic data 189
Decomposition of aromatic diazonium compounds 201
Hydrogen peroxide decomposition in the presence of organic material. A case study 213
Secondary reactions and detonation hazards in the production of adipic acid 223
Gas evolution and pressure increase during undesirable chemical reactions. A survey of the experimental methods to detect gas evolution and pressure increase 239
The theoretical and experimental investigation of a catalyst-controlled semi-continuous process. An alternative approach 251
Determination of thermal and kinetic data of the diazotisation of 6-bromo-2,4-dinitroaniline with nitrosylsulphuric acid 277
Exothermic secondary reactions 289

Self-heating
The calculation of adiabatic thermal explosion from isothermal DSC measurements 165

Solid solution
On the estimation of thermodynamic excess properties of binary solid solutions 17

Solvation
Enthalpies of transfer of selected ions from water to water–propan-2-ol mixtures. Some quantum chemical aspects of the ionic solvation 9

Specific heat
Molar heat capacities of some derivatives of uracil and theophylline 37

Spreadsheet
A spreadsheet kinetic model and its use to compare ARC and Dewar storage test data for two exothermic decompositions 177

Stability
Hydrogen peroxide decomposition in the presence of organic material. A case study 213

Sublimation
The thermodynamics of sublimation and vaporization of some volatile β-diketonates complexes with the elements of HTSC phases 137

Superconductor
The exchange of oxygen isotopes in high-temperature superconductors 119
The thermodynamics of sublimation and vaporization of some volatile β-diketonates complexes with the elements of HTSC phases 137

Tautomer
The thermal decomposition of aminotetrazoles. Part 2. 1-Methyl-5-aminotetrazole and 1,5-diaminotetrazole 53

TG
The thermal decomposition of aminotetrazoles. Part 2. 1-Methyl-5-aminotetrazole and 1,5-diaminotetrazole 53
Thermal analysis of conducting polymers. Part 3. Isothermal thermogravimetry of doped and pristine polyaniline 75

TGA
Thermogravimetric studies of poly(oxymethylene-co-dimethylsiloxane) copolymers 67
Thermal analysis of conducting polymers. Part 3. Isothermal thermogravimetry of doped and pristine polyaniline 75

Theophylline
Molar heat capacities of some derivatives of uracil and theophylline 37

Theory
Determination of chemical kinetics by DSC measurements. Part 1. Theoretical foundations 143

Thermodynamics
Computed gas-phase thermodynamics of the N_2–O_2 complexes 1
On the estimation of thermodynamic excess properties of binary solid solutions 17
Infrared spectroscopy and thermodynamics of indium tri-iodide vapour species 111
The thermodynamics of sublimation and vaporization of some volatile β-diketonates

complexes with the elements of HTSC phases 137

Topological index

A topological index and its applications. Part 3. Estimations of the enthalpies of formation of mixed halogen-substituted methanes, silanes and boron mixed halides 85

TVA

The thermal decomposition of aminotetrazoles. Part 2. 1-Methyl-5-aminotetrazole and 1,5-diaminotetrazole 53

Uracil

Molar heat capacities of some derivatives of uracil and theophylline 37

Vaporization

The thermodynamics of sublimation and vaporization of some volatile β-diketonates complexes with the elements of HTSC phases 137

VSP

Gas evolution and pressure increase during undesirable chemical reactions. A survey of the experimental methods to detect gas evolution and pressure increase 239

Water

Enthalpies of transfer of selected ions from water to water–propan-2-ol mixtures. Some quantum chemical aspects of the ionic solvation 9

Excess molar enthalpies of mixing of benzene with pyridine bases 31

XRD

Polymorphism and thermal behaviour of 3-*para*-toluyl-1,2,2-trimethyl cyclopentane carboxylic acid 97
